

Aim and Objectives

Aim:

The Conference brings together researchers, academics, engineers, local and governmental authorities, economists and NGOs in order to address and discuss emerging environmental issues, scientific achievements, research challenges and international collaboration for preserving water living resources (with special focus on **Danube River, Danube Delta and the Black Sea**).

Objectives:

- defining new research priorities in sustainable environmental management;
- presenting new tools useful in aquatic living resources management;
- considering living resources as environmental and diversity indicators;
- proposing potential solutions for problems related to biodiversity conserving in the framework of environmental impact on biota;
- fostering national and international collaboration in the aquatic living resources field.

Call for papers

AQUALIRES will feature presentations by international keynote speakers, oral and poster presentations, as well as a **Round Table “Sustainable management of aquatic living resources - Danube River, Danube Delta and the Black Sea”**.

Authors are invited to **submit abstracts** for oral and poster presentation, related to conference topics, until **15th of November 2013**. Accepted abstracts will be published in Conference Book of Abstracts and the full text of **selected papers** will be published, after peer reviewing, in Journal of Environmental Protection and Ecology – JEPE or in Environmental Geotechnics - ICE
