

Assesing the vulnerability of the Black Sea marine ecosystem to human pressures (ANEMONE)

Official site:

<http://www.anemoneproject.eu/>

Project Duration: 29 months (2018-2020)
Funded under: the Joint Operational Programme Black Sea Basin 2014-2020, Programme priority: 2. Promote coordination of environmental protection and joint reduction of marine litter in the Black Sea Basin

Coordinated by: National Institute for Marine Research and Development "Grigore Antipa" (NIMRD)

NIMRD Project Coordinator: dr. Laura Boicenco

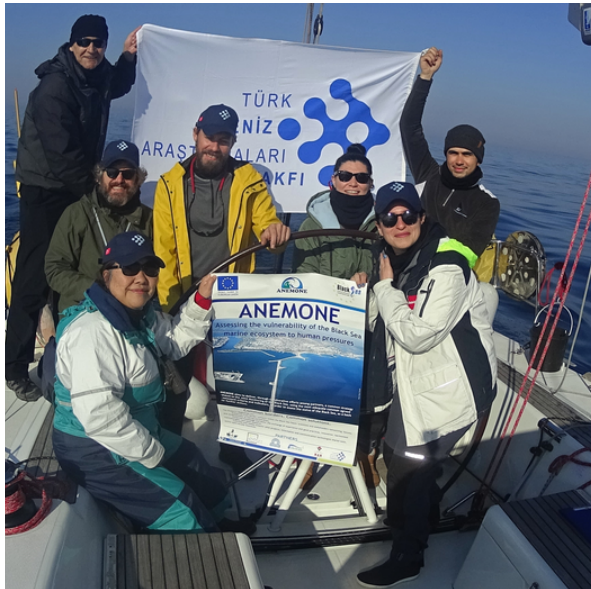

The ANEMONE Project aims to deliver, through collaborative efforts among partners, a common strategy related to the Joint Monitoring of the Black Sea, using the most adequate common agreed assessment criteria and indicators, in order to assess the status of the Black Sea, as a basis for further actions.

The Project's objectives are:

- Enhanced cross-border contacts within the Black Sea Basin: scientists and stakeholders networking, forums, and establishment of lasting partnerships;
- Enhanced knowledge and skills: the exchange of experience and good practices, innovation, harmonized methodologies, and joint research;
- Concrete and visible outputs: pilot projects, information and communication technologies shared tools, online open-access resources.

Partnerships

Romania (National Institute for Marine Research and Development “Grigore Antipa” (NIMRD), Mare Nostrum Non-Governmental Organization), Bulgaria (Institute of Oceanology – Bulgarian Academy of Sciences – IO-BAS), Turkey (Scientific and Technological Research Council of Turkey – Marmara Research Center – TUBITAK-MAM – and Turkish Marine Research Foundation – TUDAV) and Ukraine (Ukrainian Scientific Center of Ecology of Sea – UkrSCES).

Black Sea state of environment based on ANEMONE Joint Cruise

Common borders. Common solutions.
