COASTAL
Collaborative Land-Sea
Integration Platform

Project Duration: 45 months (2018-2022)

Funded under: H2020-EU.3.2.1.3., H2020-EU.3.2.5.

Coordinated by: Vlaamse Instelling Voor Technnologisch Onderzoek N.V. , Belgium

NIMRD Project Coordinator: dr. Luminita Lazar

The overarching objective of COASTAL is to improve the rural-coastal synergies in strategic business and policy decision making and collaboration between coastal and rural actors. This is achieved by developing, demonstrating and applying a generic toolset and performance indicators by combining a multi-actor approach with system dynamics modelling. This allows us to understand the interactions with market, demographic, environmental and climate forecasts, and quantify the positive and negative externalities.

COASTAL:

- contributes to integrated coastal-rural planning and coastal-rural synergy in the case study regions and the wider EU territory
- develops a durable, online platform for knowledge exchange about coastal-rural synergy with concrete examples and tools for supporting land-sea collaboration
