

SCIENCE EDUCATION

**BLACK SEA MARINE KNOWLEDGE
FOR ALL**

**WHEN EDUCATION MEETS
ACTION, THE SEA HAS A
FUTURE**

WHY IT MATTERS:

Building ocean-literate citizens means shaping informed decisions, resilient ecosystems, and sustainable marine economies from the classroom to the coast

Building Ocean Literacy across the Region

- Black Sea ocean literacy programme: school modules on biodiversity, tourism & pollution
- Documentary series: real-world marine science on plastics, climate & aquaculture

Connecting Stakeholders through Education

- Clean-up & education days: hands-on awareness in schools and coastal towns
- Aquaculture workshops: training local farmers on eco-friendly practices

CORE CHALLENGE:

Empowering society with marine science education to inspire action on climate, biodiversity, aquaculture, and sustainable tourism

Bringing research into the classroom

- Marine explorer excursions: student trips with sampling, monitoring & research activities
- Youth policy roundtables: students tackle real marine problems with real solutions

Fostering critical thinking & innovation

- Marine policy labs: draft marine conservation laws in simulation sessions
- Biodiversity App: track marine species and ecosystem health in real time
