

March 14, 2025, Constanta, Romania

National Institute for Marine Research and Development "Grigore Antipa", together with the BS-SEOS project team, is pleased to invite you to the **Stakeholders Meeting**, organized in the framework of **Black Sea Smart Marine Environmental Outcome System (BS-SEOS)** project. This project is funded by the **European Union through the Interreg NEXT Black Sea Basin Programme, priority "Clean and Green Region"**.

BS-SEOS is coordinated by the Turkish Metal Industry Employers' Association (MESS), with partners Istanbul University (Turkey), National Institute for Marine Research and Development "Grigore Antipa" (Romania) and National Environment Agency (NEA) of Georgia.

The project aims to improve the ecological status of the Black Sea by collecting and analyzing environmental data. Using innovative technologies such as autonomous surface vehicles with integrated sensors, the project facilitates continuous monitoring of key parameters for the marine environment, such as temperature, salinity, oxygen level, chlorophyll, pH, as well as depth and seabed characteristics (bathymetry). Forecasting technologies based on artificial intelligence will be used to generate accurate forecasts, facilitating appropriate decision-making and effectively addressing challenges in the Black Sea region.

Your participation in this event honors us, and your opinions and involvement will contribute to the success of this meeting.

The event will take place **on March 26, 2025**, starting at 9:30 AM, at Hotel Boulevard, Panoramic Room, 3rd floor, Mamaia Boulevard, no. 294, Constanța.

For the smooth running of the event, please confirm your presence and the number of participants by March 21, 2025, 12:00 PM.
